To save more time,
We have subscribed to a new dynamic tool named: *Ebsco Discovery Service (EDS)* which will enable the user to search within our databases and electronic books from one single place in a more efficient and active way.

Very few databases were not included inside this tool such as:
World Development Indicators *WDI*, Africa Development Indicators *ADI* and Global Economic Monitors *GEM* Due to its different nature of search, though you can always search them individually as they will be found opposite to the searching box or under the online databases list under *E-Resources* tab.

On campus access [Click Here](#) Off campus access [Click Here](#)

- Use the **On campus** link, when you are inside the BUE
- Use the **Off campus** link, when you are at home, or anywhere else (**log in with your BUE e-mail user name & password**)

Note:
In case of being **On Campus** or **Off Campus**, your search results are the same, the only difference is the way you access the database

Abstract: Two popular leadership models were examined: transformational/transactional leadership and leader member exchange (LMX). The aim was to assess which model is the most appropriate to use when coaching a baseball team to build teamwork. While the transformational/transactional model was found to be sufficient to determine coaching behaviors towards the team as an entity and in inspiring the team, it was not found to address sufficiently the actual workings of the coach-player relationship. For this purpose, the LMX model was considered to be more useful. The LMX model also included more specific mechanisms for the improvement of teamwork than the transformational/transactional model.[ABSTRACT FROM AUTHOR]
