Published Date from January Year: 2005 to July Year: 2010

The **Advanced Search** provides more flexible methods of searching from the start. You can combine terms using Boolean operators (AND, OR & NOT); you can look for keywords in all the text, the title or the abstract to focus your search; you can limit your search to **full text** materials and by **date** as well as many other options

Your search results will be displayed as a list of short references. You can view a summary of the article by holding your mouse pointer over the spy glass. And if the full text is available, there will be a link to either **HTML** or **PDF** format.
