A **Basic Search** will often result in a large number of records retrieved. You can limit the search by moving the date slider to retrieve more recent results. Or you can limit by the type of publication such as periodicals (journals), books or reports.

The **Advanced Search** provides more flexible methods of searching from the start. You can combine terms using Boolean operators (AND, OR & NOT); you can look for keywords in all the text, the title or the abstract to focus your search; you can limit your search to **full text** materials and by **date** as well as many other options
