exploring, making connections, and making practical use of information. Information-literate citizens know how to use information to their best advantage at work and in everyday life. They identify the most useful information when making decisions such as where to locate a business, how to vote, or whether to have a child. They are able to evaluate newscasts, advertisements, and political campaign speeches, recognizing when statistics are being used to support only one aspect of a complex issue. Current policy questions pose unprecedented complexity and international implications: immigration and "brain drain," the drug crisis, and the state of the environment. When statistics saturate all aspects of an issue, information literacy enables citizens to recognize deception and disinformation, so that they may make a truly informed decision. These citizens appreciate the value and power of information. They believe in the need for information to address problems and questions in their own lives, in their communities, and in society. They understand that information is not necessarily knowledge until it has been analyzed, questioned, and integrated into their existing body of knowledge and experiences. They are equipped to be lifelong learners because they know how to learn. For Workers: The workplace of the present and future demands a new kind of worker. Reading and arithmetic ability simply are not enough. In a global marketplace, data is dispatched in picoseconds and gigabits. The deluge of information must be sorted, evaluated, and applied, and workers must be able to gather, synthesize, interpret, and evaluate. Lack of these skills currently costs
